Mission Statement

Our mission is simple - to provide reliable and comprehensive drainage solutions that exceed customer expectations.

Our commitment to excellence drives us to deliver prompt, efficient, and effective services, utilizing state-of-the-art equipment and the latest industry techniques. We aim to be the trusted partner our customers can rely on for all their drainage needs.

We strive to foster long-lasting relationships with our clients by prioritizing their satisfaction and delivering exceptional customer service. Our knowledgeable and skilled team of professionals works diligently to address specific drainage issues, offering tailored solutions that are cost-effective and sustainable.

Environmental responsibility is at the core of our operations. We are dedicated to implementing environmentally friendly practices and promoting sustainable solutions that minimize our ecological footprint. By doing so, we aim to contribute to a cleaner and healthier environment for future generations.

Integrity, transparency, and professionalism guide every aspect of our business. We operate with honesty and fairness, ensuring clear communication and providing accurate assessments and solutions. We believe in building trust and maintaining the highest ethical standards in all our interactions.

COMPLETE DRAINAGE SOLUTIONS

Tankering Services

SWDS has a wide range of tankering solutions from commercial and residential flood relief to emptying road gullies, de-silting, and debris removal. Our fleet has the capability to offer a comprehensive range of solutions anywhere in the UK 24/7, 365.

SWDS provides first-class service and reliability whilst maintaining its reputation for delivering on time and to a high standard.

OUR FLEET:

- 4,000 Gallon Tankers
- 6,000 Gallon Tankers
- Road Sweepers
- JHL Super Flexes (Jetting Tankers)
- Van Paks (Jetting Vans)
- Gully Trucks
- Pump Vans
- Muller Recycling unit
- JHL Flexline (Jetting Tanker)
- Welfare Vehicles
- Assortment of Vans and Pick Up Trucks

Drain Repair & Lining

Drain Repair and Lining is an additional service that SWDS offers as a result of customer demand.

Repairing rather than replacing saves time, resources and cost. By installing a new liner over the damaged area drains get a new lease of life for many years to come. A quick and efficient process, drain lining needs no excavation and has minimal disruption to the local environment.

No job is too small and coupled with a full CCTV survey we can quickly identify any major issues and previously unseen faults. Full pre and post-drain surveys are carried out as part of our service.

SERVICES PROVIDED INCLUDE:

- Pre & post survey report
- No minimum length of repair
- 50mm to 5000mm diameters
- UK coverage
- Temporary traffic management
- Post-service road sweeping

COMPLETE DRAINAGE SOLUTIONS

Sewer Cleansing

Drain cleansing is just as important as unblocking. Keeping on top of maintenance in known problem areas ensures a safe and efficient drainage infrastructure.

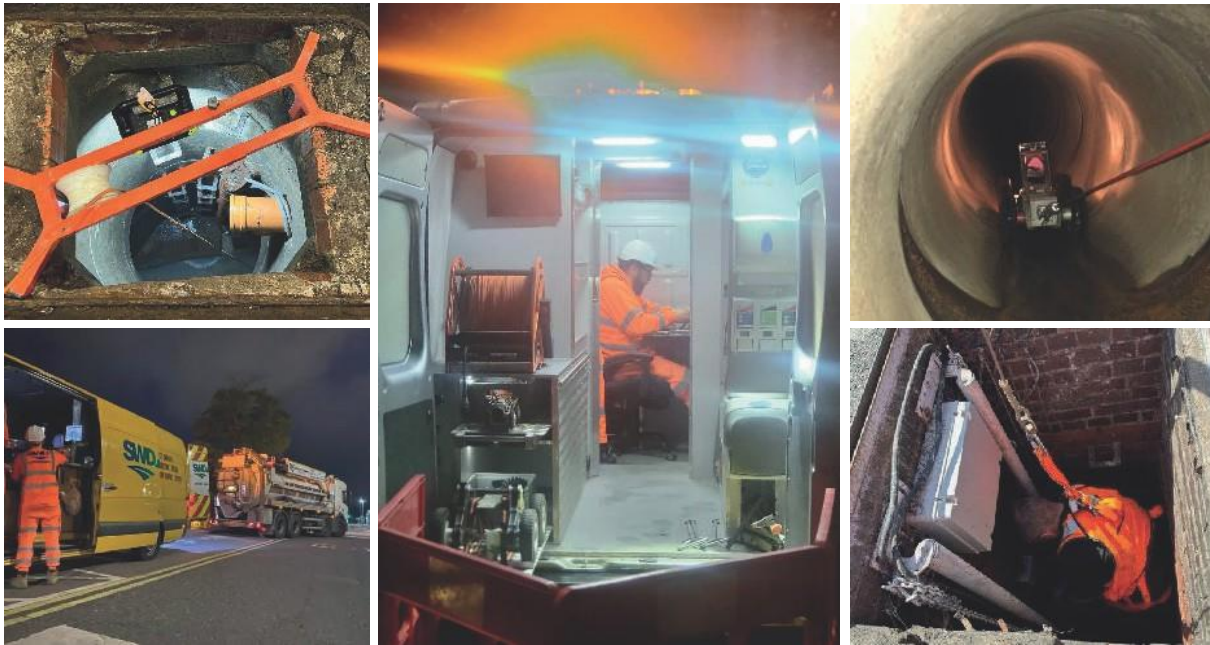

Using the latest drain jetting equipment our fleet of Jet Vac units can handle the most demanding of jobs by discharging high-pressure water. The suction pumps are then used to gather any excess runoff and waste to be disposed of later.

SERVICES PROVIDED INCLUDE:

- Sewer unblocking
- Sewer cleaning
- Waste removal
- Jet Vac
- External Works
- Camera Inspection
- Traffic management

Drain Inspection & Surveys

Identifying a blockage is straightforward though understanding the structural integrity of drains, sewers, and pipes is more difficult. SWDS uses the advanced 360° Wincan verification software to conduct a survey, so no manual entry is required.

The ultra-high-resolution images and easy maneuverability of the cameras enable a detailed structural analysis of the drain, often picking up issues unseen by the human eye.

When the survey is complete and works approved defect reparation can begin through patch lining. This ensures that the piping is restored to good working order.

Every image captured will be included in the technical report outlining the issues and recommendations for repair.

SERVICES PROVIDED INCLUDE:

- Drain surveys
- CCTV images
- Full technical report
- 24/7, 365 call out
- Temporary Traffic Light Systems
- Permits & Local Authority Liaison

COMPLETE DRAINAGE SOLUTIONS

Septic Tank Emptying & Cleansing

With our fleet of Tankers SWDS can drain and clean a wide range of septic tanks in most locations.

Using specialist industry-specific equipment, SWDS uses hydro-jet technology to clean septic tanks

SWDS is fully compliant with waste removal and disposal and hold the relevant certifications.

SWDS provides first-class service and reliability whilst maintaining our reputation for delivering on time and to a high standard.

SERVICES PROVIDED INCLUDE:

- Septic Tank Emptying
- Septic Tank Cleansing
- Waste Disposal

Pump Maintenance & Repair

Pump Maintenance and repair are often overlooked but keeping kit in a good state of operation is critical.

SWDS provides a comprehensive servicing and support package to ensure your systems are running efficiently.

Van Pac Blockage & PPM

SWDS boasts a team of skilled professionals who are well-versed in the complexities of drain unblocking. With years of experience in the industry, we have encountered various drainage issues and have developed effective solutions to tackle them promptly and efficiently.

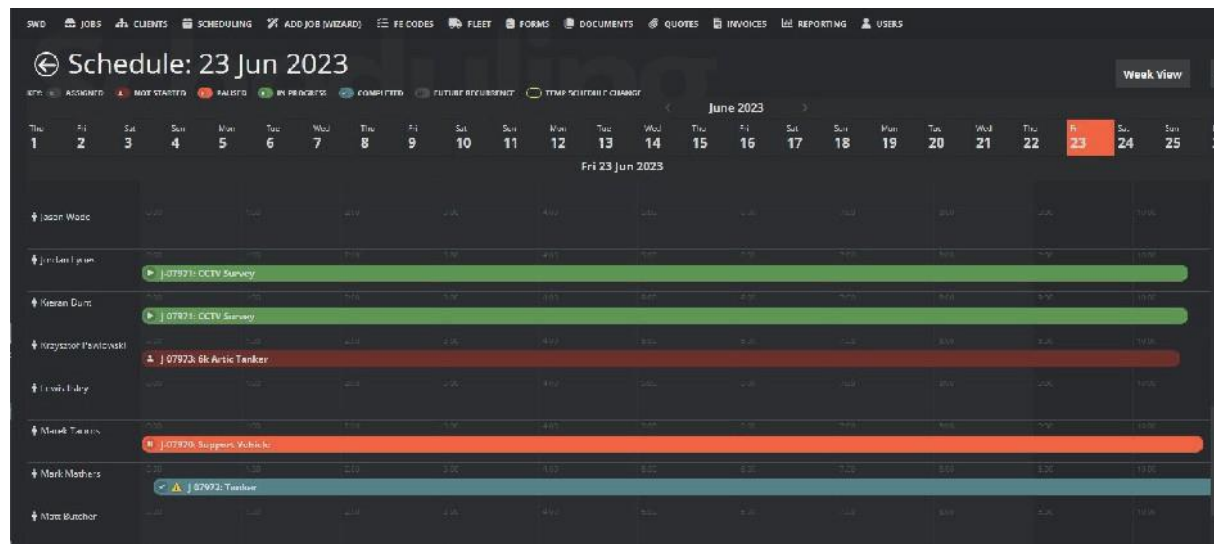

We invest in the latest technology and equipment to ensure that our drain-unblocking services are of the highest quality. From advanced CCTV cameras for an accurate diagnosis to powerful hydro-jetting machines for a thorough cleaning, we utilize cutting-edge tools that enable us to deliver outstanding results.

SERVICES PROVIDED INCLUDE:

- Available 24/7, 365
- Drain repair and lining
- Push Rod CCTV
- Surveying services
- Traffic Management

Real Time Reporting

SWDS is committed to being 100% upfront and honest with our clients from day one

In a connected world, we use the My Mobile Workers platform that helps keep track of our workforce, their safety, and client transparency as to the status of each job, so no need for endless spreadsheets or unnecessary paperwork.

Using this platform helps ensure that all work is safe, compliant, and has followed procedure. All images are location and time-stamped to show proof of completion and transparency

Road Sweeping

Road Sweeping plays a small yet vital role in keeping our local environment clean and tidy. Our road sweepers can cover all manner of jobs such as:

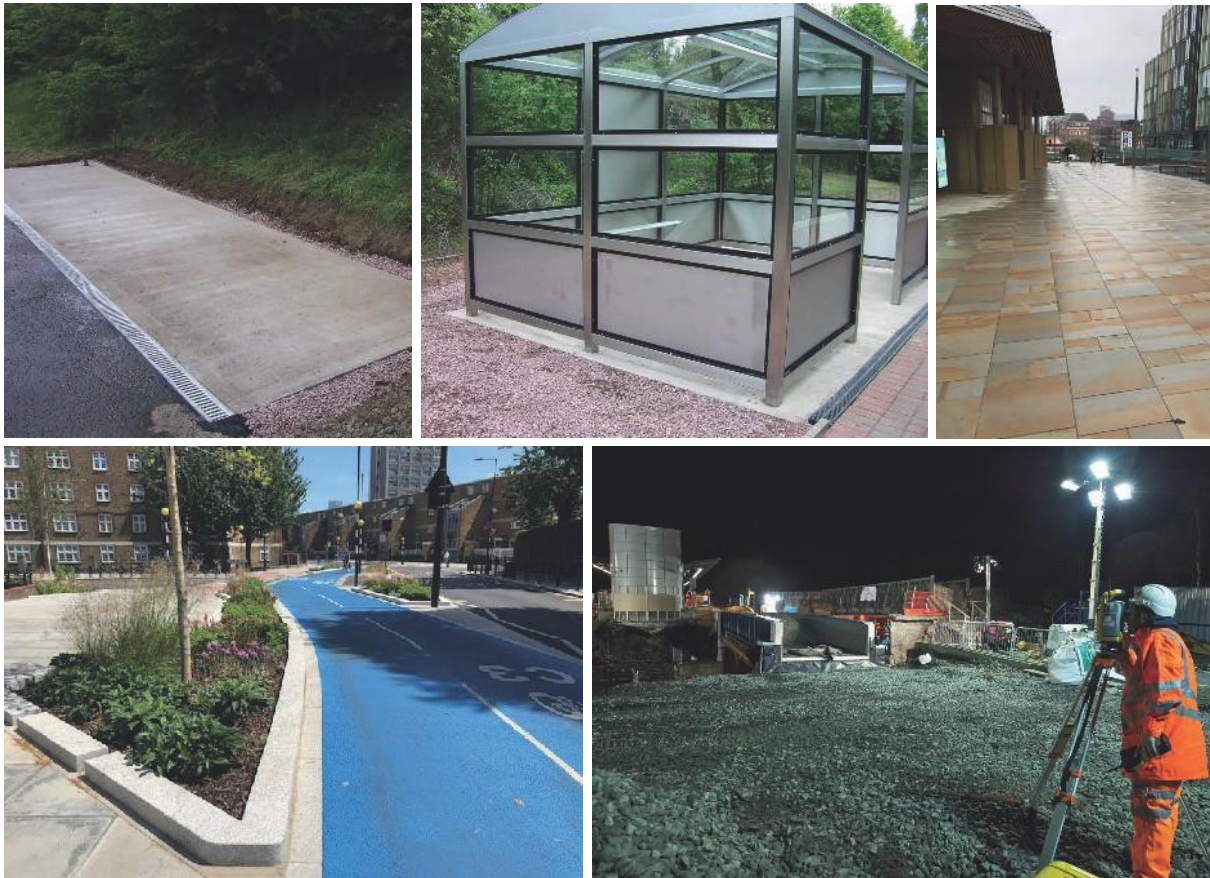

- Public and private road sweeping
- Motorways
- Car parks
- Construction sites
- Industrial and retail parks
- Event clean up

Our fleet of Bucher MaxPowa V80 road sweepers can handle the most demanding of jobs in most environments including gulley sucking.

The V80 sweepers have also been customised with additional Ogden Safety Systems, proximity sensors and lighting, plus external camera monitoring for complete 360° vision.

Civils

SWDS has the capability to manage and deliver a wide variety of minor civis and building works, across a diverse range of sectors including utilities, engineering, rail and commercial environments.

We secure long term partnerships with customers to provide a quality service which is flexible and bespoke to meet the needs of each customer.

We undertake the project management and delivery of all minor civis works using our own directly employed, highly trained and competent teams as well as those of our vetted supply chain.

SWDS provides first class service and reliability whilst maintaining its reputation for delivering schemes on time and to a high standard.

SERVICES PROVIDED INCLUDE:

- Drainage
- Foundations
- Retaining walls
- Concrete slabs
- External Works
- Surveying Services
- Footpath and Road construction

Traffic Management

National Highways Sector Scheme approved to NHSS 12A/B & 12D SWDS offer a comprehensive range of traffic management services throughout the UK.

Working 24 hours a day, 365 days a year and equipped with the latest technology our experienced operatives and management team will ensure you receive a safe & effective traffic management system regardless of size.

Our fleet of TM Vehicles & Impact Protection Vehicles are all fitted out with remotely viewable CCTV cameras and our operatives are equipped with mobile tablets allowing you to see your sites in real time from anywhere.

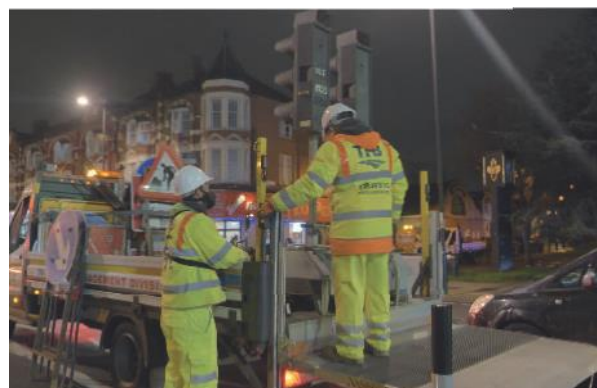

Paramount to our continued growth is our emphasis to exceed our clients expectations on every project.

SERVICES PROVIDED INCLUDE:

- Low Speed TM
- High Speed TM
- Road Closures & Diversions
- Temporary Traffic Light Systems
- UTC & Temporary Pedestrian Crossings
- IPV Hire
- Variable Message Signs

ADDITIONAL SERVICES:

- Surveys & Planning
- CAD Drawings
- Permits & Local Authority Liaison

Hydroblasting & Vapour Removal

Hydroblasting is the most environmentally friendly method of Line Removal, Retexturing Asphalt and Cleaning surfaces. SWDS's Hydroblaster units use clean water without additives at ultra high pressure to deep clean surfaces, and we offer our services nationally 24 hours, 7 days a week.

Our Hydroblasters operate at Ultra High Pressure of up to 40,000 PSI (2700 Bar), and the various different heads that we carry makes them the perfect tool for a variety of applications.

Unlike other cleaning methods, our Hydroblasters collect all of the dirt extracted filtered down to 5 microns into an onboard tank for disposal, reusing the filtered water thereby ensuring there is no illegal run off into surface drains.

All waste is disposed of in compliance with Environment Agency regulations and our Waste Carriers License.
